

HOW TO MAKE A SAND PAPER SAND CASTLE

SUPPLIES NEEDED TO MAKE THIS SAND CASTLE CRAFT

- tan cardstock (ideally 12" x 12")
- blue tissue paper
- tan sand paper sheets
- scissors
- school glue

INSTRUCTIONS FOR THIS SAND PAPER SAND CASTLE CRAFT

1. Gather your supplies. Begin by cutting out different shapes from your sand paper sheets. Cut out rectangles, triangles, small squares, circles and any other shapes you'd like. Leave a few of the sand paper sheets uncut for use as well.
2. Lay out the tan cardstock, tissue paper, sand paper shapes and school glue on a table and let children create their sand castle craft.

Give as much or as little direction as you feel necessary. If completing this activity with a preschooler or elementary-age child, try allowing them to cut out the shapes from the sand paper on their own to promote improving scissor cutting skills.

With the variety of different shapes available, every child will love nourishing their creativity by creating a unique looking sand castle craft. Display the finished sand castle craft on the fridge, an art wall or somewhere in the home where children can feel proud when seeing their artwork.
